Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.  
 A "1" or "2" indicates that the place is also a MCD; the false MCD number is also shown. A "3" indicates that the place is also a false MCD; the false MCD number is also shown.  
 2 This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity. Tribal census tracts are defined within a federally recognized American Indian reservation or off-reservation trust land. Tribal census tracts are not defined within an American Indian hierarchy rather than by state and county. Where reservations overlap state and county boundaries, tribal census tract numbers may be assigned on both sides of the boundary, and, if so, constitutes a single tribal census tract entity.  
 3 A "1" or "2" indicates that the block number indicates that the block number is repeated elsewhere in the block.
